#### **DETAILED ACTION**

1. This office action is in response to communication filed on 6/22/2006.

2. Claims 1-12, 14-15, 17-28, 30-31, 33-47, 50, 53-59 are presented for examination.

#### Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
   The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claim 1, line 5, recites "a credit company" and on line 6, it recites "a credit company. It is unclear if the credit company and line 6 are the same entity or different entity. For examination purpose it will be treated as the same entity.

## Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 1-7, 14, 17-28, 30, 33-38, 46, 50, 53-59 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lewis et al. (6,233,565 Lewis) in view of Blonder (5,708,422 hereinafter Blonder).

With respect to claims 1-6, 14-15, 17, 30, 33, 46, 50, 53-59 Lewis teaches a computer system for verifying a commercial transaction between an account-holder and a merchant (Figure 3). A processing unit for processing data and code (Figure 3); a

Application/Control Number: 09/617,361

Art Unit: 3622

memory device for storing said data and said code (see database 196), said code including a credit card company communications module operative to facilitate a connection with a credit card company for receiving a transaction verification request from said credit company (see figure 3, 400); a verification module responsive to receipt of said verification request and operative to transmit verification to said credit card company (see Figure 3, 9 and col. 17, lines 5-15); wherein said computer system is a third party verification system separate from said merchant, said credit company and said account holder (see Figure 3).

With respect to an account holder communications to facilitate a separate connection with said account holder for verifying transaction with said verification module only if said transaction is verified by said account-holder. Blonder teaches on Figure 1, item 135, the account holder verifying the transaction via a pager. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included an account holder communications to facilitate a separate connection with said account holder for verifying transaction with said verification module only if said transaction is verified by said account-holder in order to allow the customer to confirm or deny the transaction and therefore prevent fraud.

Claims 7, 9-11, 18-23, 34-39 further recite an authentication code for verifying the transaction. However, it would have been obvious to one having ordinary skill in the art at the time of the invention to have used an authentication code prior to reciting a

Application/Control Number: 09/617,361

Art Unit: 3622

portion of the approval request since, at least, personal identification numbers, or pin, are well known in the art for identifying/authenticating customers. Use of the pin authentication would have at least reduced the processing and storage demands of voice recognition particularly considering the number of customers the system would need to serve.

7. Claims 8-12, 15, 24-28, 31, 39-44 and 47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lewis in view of Joao et al. (6,529,725 hereinafter Joao)

With respect to claims 8-12, 15, 24-28, 31, 39-44 and 47, Lewis does not show waiting for a connection initiated by the account holder. Joao teaches the account holder can contact the central processing office or processing center to approve the transaction (col. 7, lines 12-18, col. 19, lines .........1-7, col. 19, line 65 - col. 5). It would have been obvious to one having communication with the system as in Joao since this would have provided the customer the time he/she needed to decide whether to approve/disapprove the transaction. It also would have been obvious to have transmitted a notice to the account holder when the transaction approval request was disclaimed as in Joao since this would have provided a complete record of activity for the account holder.

#### Response to Arguments

8. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

#### **Conclusion**

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

## Point of contact

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Raquel Alvarez whose telephone number is (571)272-6715. The examiner can normally be reached on 9:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eric w. Stamber can be reached on (571)272-6724. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
